

NOTICE OF WITHDRAWAL OF IP STANDARD TEST METHODS

This section is to notify users of the intention to withdraw methods that, in the opinion of the Test Methods Standardisation Committee, no longer have relevance to present day petroleum technology. The relevant Panels and Sub-Committees have given careful consideration prior to applying to the Test Methods Standardisation Committee for withdrawal. The EI constitution requires publication of each method withdrawal notice for two years before the method ceases to be published. During this period there is provision and sufficient time for any person to protest and present a case against such withdrawal.

<i>IP Reference</i>	<i>Method Title</i>	<i>Panel</i>	<i>Year of notification</i>	<i>Year of withdrawal</i>
23	Gasoline engine crankcase oil fuel dilution	SC-C-4	2011	2013
284	Saponifiable and unsaponifiable in oils, fats and waxes	SC-G-2	2010	2012
318	Characterization of pollutants GC	SC-G-6	2010	2012
